

I have 12 years of commercial experience in software engineering. I work mainly in **JavaScript** and Python, formerly C#, and occasionally C++. I have handled a broad range of **front-end** and UX design topics, as well as **back-end** work (SSR/SSG, API proxy), database programming, and device communication.

As part of my own business activity, I successfully delivered and implemented solutions improving operations in small companies. I worked on contracts for large clients from the **USA, Norway, Germany, and Poland**, delivering scalable systems. In recent years I focused my professional growth on frontend technologies, with a stack centered around **React**. I continuously improve work organization - both my own and the whole team's - using **artificial intelligence** tools and **CI/CD automation**. I care about **security, architecture, and code clarity**.

Work experience

- March 2021 - present** — Senior Software Engineer at Sofomo - projects for US clients - e-commerce, CMS, digital products, integrations, migrations, CI/CD automation, and technical leadership in smaller teams
- November 2020 - February 2021** — Self-employment - a series of implementations improving workflows in a food manufacturing company
- March 2020 - October 2020** — Front-end developer at Navarra Lab - e-commerce + storefront
- February 2020 (project suspended)** — Front-end developer at Code and Pepper - Flutter project for the fintech domain
- August 2019 - January 2020** — Self-employment - a fruit plantation management system including software for counting harvests via a data collector and a desktop component synchronizing reader data for payroll and report generation
- January 2018 - July 2019** — Full-stack developer at Forte_Digital - projects for the Scandinavian market
- January 2014 - June 2017** — Software developer at Comarch - projects for the public sector, then work in the R&D department
- February 2013** — Individual contract for an NZOZ clinic - patient and test results database management system.

Education

UNIVERSITY

- Computer Science and Econometrics, Faculty of Management, AGH University of Science and Technology (2011-2016)

COURSES

- Designing ergonomic user interfaces (2017)

FOREIGN LANGUAGES

- English (fluent, C1 certificate)
- French (basic)
